**MASURA VE KAÇITÇILIK**

### About Us

Founded in 1981 in a 50 m<sup>2</sup> indoor area in Rami, Istanbul, Kater Paper continues its operations today in a modern facility of 5,000 m<sup>2</sup> in Arnavutköy. In 1994, our company became institutionalized under the name "Kater Kağıt Ltd. Şti." and is one of the pioneers of the industry with over 40 years of production experience.

Primarily producing paper tubes, the company also manufactures textile papers, protective paper, corrugated cardboard, vacuum nylon and cut-size cardboard. With its registered brand PAPERPLUS, it has adopted sustainable production and customer satisfaction as its core principles.

### Our Vision

To be a leading brand that offers innovative solutions in the paper and packaging industry, recognized in national and international markets, and adds value to the future with a sustainable production approach.

### Our Mission

To provide the most suitable solutions for the needs of different sectors through customer satisfaction-oriented, environmentally friendly, high-quality, and flexible production processes.

### **Applications in Different Industries:**

Our edgeboards, also known as corner protectors, corner boards, angle boards or edge protectors, are used in a wide variety of industries, such as steel, aluminium, beverages, doors and windows, electronics, paper, consumer goods, personal care and also in the agricultural sector.

The possibilities are endless! To find the right product for your purposes, we can test the strapping and compression strength in order to find the right solution for you.

## Quality Control

With our 23 years of experience, we have 3 technological systems that we use for quality and control measurements of the products we produce.

**1. Newtonmeter:** It is the device that we measure the strength, hardness and breaking points of the products we produce.

**2. Humidity meter:** It is a measuring device that determines the humidity, drying points and measurements of the products we produce.

**3. Glue Viscosity Value Measurement:**  
The strength levels of our products at the production stage are the devices we measure viscosity.
